

management tool

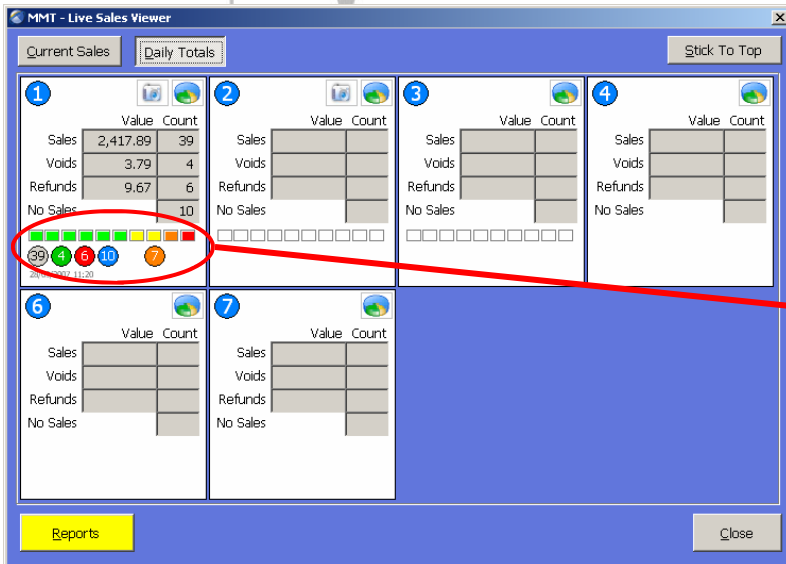

External sales viewer

MMT allows managers / owners to view sales as they happen on any networked PC.

They can view each terminal as well as totals both as text and visually.

Audible alarms alert the user to certain functions being carried out on a terminal and a live IP Camera link shows the sale in progress.

- Refunds
- Voids
- Paid In
- Paid Outs
- Hot Codes
- No Sales
- Sales

A Cash in drawer bar graph shows against a pre-set level to determine pick-ups and when they should be carried out

The sales can be viewed in detail and reported on to view activity as it happens and not days later.
